Quarterly Investment Report – 31 March 2023

This Quarterly Investment Report presents the results of the Public Trustee's Funds Management Service for the quarter ended 31 March 2023.

The Public Trustee is a statutory entity founded in 1881. At the end of the March 2023 quarter, it had approximately \$1.3 billion in funds under management. The Public Trustee's Funds Management Service has a record of high quality, proven and consistent investment performance. The Public Trustee is proud of its long-standing reputation for trust and reliability, and the vital role it plays for our customers.

The March quarter was volatile for financial markets, however, pleasingly all of the investment strategies provided positive returns for customers. The Public Trustee's investment strategy returns ranged from 5.89% p.a. for Equities, to 0.58% p.a. for Cash, net of fees.

Over the long term, ten year returns stand at 1.69% p.a. for Cash to 8.37% p.a. for Equities, net of fees. The investment strategy performance relative to CPI based targets, over the suggested time horizon, is illustrated below. Due to the recent continued high levels of inflation (CPI) and market volatility a number of investments now trail CPI based objectives. This may continue in the short term, while inflation remains high.

➤ Market Overview

Global

The March quarter was volatile for financial markets. The quarter started favorably with investor confidence being boosted by expectations that inflation had peaked and signs that Central Banks were slowing the pace of policy tightening. February produced conflicting economic data which showed that deflation was not occurring. This was followed by the failure of a US Regional Bank followed by the failure of a European financial institution.

Australia

During the quarter Australia recorded an annual inflation rate of 7.0%, a modest decrease in the inflation rate compared to the previous quarter. The Reserve Bank of Australia (RBA) increased official interest rates two times during the quarter by a total of 0.50%, increasing the cash rate to 3.60%. The Australian dollar slightly depreciated against the US Dollar, finishing the quarter at \$0.67 US.

Share Markets

Global Shares had a reasonably optimistic start, however were dampened with high inflation, increasing interest rates, and the collapse of Silicon Valley Bank in the US. Despite this, the global share market still managed to provide positive returns, with the MSCI All Country World Index climbing 6.8% and the S&P 500 index finished the quarter 7.0% higher. The Australian share market provided modest gains during the quarter, with the S&P/ASX300 Accumulation Index returning 3.30% for the quarter.
